Amalia Sörlien

EDUCATION

Design and Product Development
Linköping University|2013- 2018
M.Sc in Engineering

The education is as much about design as solving problems and project management. I have both technical and design knowledge throughout the whole product development process, from idea to finished product.

Industrial Design Engineering
San Diego State University|2016

I started my masters degree with one semester at San Diego State University.

Development
HTML
CSS

Languages
Swedish
English

Soft skills
Ambitious
Fast learner
Team player
Curious
Positive mindset

PROFILE

I see myself as a designer and a creative engineer. I am used to work in the interface between technology and design and to use my analytical mindset as well as my creative side to solve problems. With the user in mind, I strive to capture and address the whole user experience.

WORK EXPERIENCE

Software Component Owner
Volvo Group Trucks Technology|2020- present

In this role, I have worked with two different projects. The first was to set the process of onboarding, industrializing, and maintaining new 3rd party applications for our automotive infotainment system. I managed the project communication amongst the project team and key stakeholders. In my current project, I work in the interface between our department and our brands from the US and France. As a department representative, I coordinate information and requests coming from the brands.

Human Machine Interface Engineer
Volvo Group Trucks Technology|2018- 2020

As part of an agile development team, I coordinated the projects and the flow of information to the developers. I acted as a link between UX–designers and other stakeholders. My deliveries included application viewflows and I was responsible for HMI requirements and the text translation process.

ACHIEVEMENTS

Ivy League: Introduction to Negotiation
Online course from Yale University |2020

Culture Champion
Nominated by my manager to work with our company culture and to facilitate workshops with different teams throughout VGTT |2020

Dynamic Web Application
University course for HTML, CSS and JavaScript development|2019

SAFe Training
Participated in a two-day certified SAFe agile training|2019

Driver's License B
2012
